SUMMARY

Experienced Software Developer with 6+ years in PHP, Laravel, Yii2, Vue.js, and AWS, specializing in scalable web applications and performance optimization. Strong expertise in backend and frontend development, database management (MySQL, PostgreSQL), and cloud deployment. Passionate about clean code, problem-solving, and continuous learning, always open to exploring new technologies.

EXPERIENCE

Senior Software Engineer

Canterr   **June 2025 – Present, Remote**

· Decoupled and optimized complex queries using GraphQL, reducing response time and improving overall app performance.
· Used AI-based tools to automate query optimization and improve debugging efficiency.
· Managed deployment processes, ensuring smooth releases and reliable production environments.

Php Software Developer

Optimal Virtual employee   **November 2021 – February 2024, Remote**

· Developed scalable web applications using PHP, Laravel, and Yii2 to meet client-specific requirements.
· Managed MySQL and PostgreSQL databases for smooth data integration and optimization.
· Improved dashboard performance and implemented cache automation to enhance application speed and efficiency.

Founder & Software Developer

KiaraWeb Solutions   **August 2020 – October 2021, Satna, MP**

· Founded Kiara Web Solutions, specializing in custom web development and SaaS solutions.
· Developed KiaraWeb platform for seamless online store creation and management.
· Scaled platform to 100+ users with secure payments, product management, and customization features.

Freelance Software Developer

Freelancer   **August 2018 – July 2020, Remote**

· Developed custom web applications using PHP, Laravel, and Vue.js for various projects.
· Optimized eCommerce platforms and CMS solutions to enhance user experience.
· Implemented UI/UX improvements with Tailwind CSS and Bootstrap for end-to-end solutions.

Software Developer

Bigly Technologies Pvt Ltd   **November 2017 – July 2018, Noida, UP**

· Developed web applications using Laravel framework for scalability and performance.
· Designed and implemented blog feature to enhance content management and user engagement.
· Built dropshipping platform with user authentication, order tracking, and payment gateway integration.

SKILLS

Programming Languages: PHP, JavaScript (JS), HTML, CSS, JAVA

Databases: MySQL, PostgreSQL, MongoDB (NoSQL), SQLite

Backend / APIs : Laravel 11/12, Yii2, REST APIs, GraphQL,JWT, OAuth2, Microservices

Frontend : Vue.js, Bootstrap, Tailwind CSS

Tools & Platforms: GitHub, GitLab, Bitbucket, Postman, Unleash, DataDog, Looker, Azure Data Studio

Testing: PHPUnit

Deployment: AWS, Linux Servers, Godaddy, Hostinger

Caching & Queues: Redis, Laravel Queues, Horizon

CI/CD & Agile: GitHub, GitLab , Agile/Scrum, JIRA

AI & Productivity Tools: ChatGPT, GitHub Copilot, Cursor IDE, Perplexity AI, Notion AI

EDUCATION

Master of Computer Application
Indira Gandhi National Open University · Jabalpur · 2023

Bachelor of Computer Application
Vindhya Institute of Technology & Science · Satna · 2017

PROJECT

WayFair – CDF
· Decoupled complex queries to enhance system scalability and maintainability.
· Optimized API performance using GraphQL, minimizing data load and response time.
· Managed CI/CD deployments, ensuring seamless and reliable production releases.

Heineken Bar Staff
· Led the API development for the project, ensuring smooth backend operations.
· Integrated the necessary features to manage bar staff effectively.
· Enhanced the system's reliability and performance through optimization.

Bud4Trade
· Led CSM level changes, involving architectural overhauls for improved scalability.
· Automated the Carton Module, streamlining processes end-to-end.
· Optimized the Dashboard with cache automation and revamped Hubadmin for upload management.

AboveNBeyond
· Developed the frontend using Tailwind CSS, creating a responsive and intuitive user interface.
· Collaborated with the design team to implement modern UI/UX features and ensure accessibility.
· Optimized web performance and ensured cross-device compatibility for seamless client interactions.

Budspace V4
· Implemented the Invoice Upload feature for efficient data management.
· Developed the Assure Rewards functionality to improve user engagement.
· Focused on backend stability and user-centric design for smoother operations.

Budspace v3
· Developed the API side of the full project, focusing on robust functionality.
· Integrated seamless communication between frontend and backend.
· Ensured scalability and efficient data handling for a smooth user experience.

Kayra Organics
· Developed an e-commerce platform for organic products using Laravel (backend) and Vue.js (frontend).
· Created a responsive UI with Tailwind CSS and integrated key features such as product browsing, shopping cart, and checkout.
· Implemented a secure payment gateway, ensuring smooth and reliable transactions.

Aventaya
· Developed a platform on backend functionality with Laravel and frontend design using Tailwind CSS.
· Created features for showcasing inventory, managing orders, and ensuring efficient data handling and security.
· Optimized performance and ensured seamless user experience across different devices.

Twiva – Social Commerce Platform
· Developed a platform for influencers to promote products and earn commissions, built using vanilla JS for interactive features.
· Integrated secure transaction handling, fast delivery, and product categorization for a seamless shopping experience.
· Enabled influencers to integrate products into their content for better engagement and monetization.

Hamro JGI — Loyalty & Rewards App (Nepal)
· Responsible for designing and optimizing the database architecture and implementing backend services.
· Developed secure and scalable APIs to manage user authentication, reward points, and transactions.
· Ensured smooth data flow and integration between the mobile app and server, enhancing performance and reliability.
